General Exercise Remarks

Firstly – safety and security first!! It's only an exercise and it's not necessary to get hurt or be involved in an accident. If there is any risk for your life – stop your action and report it to the trainer and Ex-CON !

Secondly – Respect the rules and laws of the host country. Be aware, we are driving on the right side of the street.

Thirdly – With the beginning of the exercise –TAST is fully responsible for everything!! If you make mistakes, you make mistakes and will learn out of them!

Fourthly – there will be some artificialities – but in principal, the exercise will stick to the mission cycle. The FEX will take part in the southern part of Styria towards the Slovenian boarder and partly in Slovenia. We use the existing real names!

Fifthly – The FEX is in principal a guided exercise – with prepared injects at several times – but due to the fact for training purpose, a time reserve is included being able to stop, be instructed and perform once more in the right way.

Last but not least – **please try to speak English** as it is the working language!
– and you are an international team!

Task:

SETUP of an OSOCC

Expectations to TAST:

- Provide a tented office for the setup of an On-Site Operations Coordination Centre (OSOCC) for an eight people EUCPT.
- Find right area for the OSOCC (safe from wind, water, close to LEMA, road connectivity, people flow, distance between tents, area for relaxation, place for generators, kitchen, toilets, drainage?, water supply, helipad etc.....)
- Security and Safety issues (too low, too nearby the water, everyone can move in
- Make a suggestion about the area to the Head of EUCPT
- Prepare and set up the OSOCC tent (The same will be done in a building).....

Findings

- Exercise is not a training on the equipment - it simulates the reality
 - An exercise has no schedule (for the participants)
 - Always expect the unexpected
 - Flexibility and also improvisation is demanded
 - Technical skills and leadership skills are equally important
 - Don't fight the problem - solve it
-
- **The technical skills of the teams improved a lot during the last 6 months**
 - **The English language has improved too**
-
- BoO was not part of the exercise!
 - Artificiality: Austria as a third country?

Some examples

➤ RDC

- Its not a decision of a TAST to setup/close e.g. an RDC

➤ Equipment

- You take all your equipment with you!
- Have you ever had everything on Paper?
- Be prepared to use different equipment

➤ Transport

- You must have the ability to handle more than one task at the same time (Multitasking)

- An OSOCC is a service-provider it is not autotelic

Other findings

- **Trainers and OSOCC Managers**
- **Observers and EC**
- **Evaluators**
- **Participants**
